

# ME 6163: Combustion Engineering

Term Paper 02

Submission Date: TBA

---

1. Make a brief description of flame initiation, propagation and termination in SI engines.  
The report should address key factors like ignition, flame propagation parameters like burning velocity, flame speed, effects of turbulence, flame classifications etc.
2. Make a brief description of flame initiation, propagation and termination in CI engines.  
The report should address key factors like fuel injection, ignition, flame propagation parameters, effects of turbulence, combustion zone etc.
